- 3. If the State Planning Office, or the Office of Five Year Plans decides to build a new dem, steel works, railroad, etc. agents and informers planted in key industry and transportation installations are used to calculate the number of so-called civilian workers, valuntary brigades, rfP solders (non-voluntary battalions of the Ezecnoslovak frmy composed of non-reliable citizens who have an obligation to work for the rmy five years or more, as part of their military duty), technician, experts, etc. The Ministry for the bistribution of Labor refers these figures to the local employment offices, district employment offices, Ministry of Justice, state Education Centers for prentice, high modes, technical colleges, etc, to learn where labor is available.
- Most workers are ordered to a job by the local employment office, especially if they are non-Communists. The students of universities and technical colleges are permitted to complete their tudies, even if they are non-Communists. They report frequently, before final examinations, for voluntary employment with the army (as rader-operator; regular officers, engineers, doctors, etc), so as not to give the employment office an opportunity to dispose of them forcibly. This last would probably meen heavy work in the mines or building industry. In intensive propaganda compaign is projected by the Ministry for the Distribution of Labor especially for the mining industry and the army. The mining apprentices, in uniform, appear in the high schools before graduation, and show the 14-year old students their uniforms, describing the way of life in the apprentice centers, how good the food is, how holidays are spent in state sanitoria, all about sports clubs, cinema and theater performences, wages, and the interesting job in mine. This apprentice team promises a bonus of 5000 crowns for every boy who joins the mining profession; it also promises two uniforms, two pairs of bhous, and a wrist watch (for enlisting in the apprentice center).
- 5. "Similar Perty public school meetings are held before the end of the school year in the secondary schools where school boys of 14 are asked by army officers to join the Czechoslovak regular ermy. Inyone interested in an officers career may apply, during such meetings, for enlistment in the officers' school (Zizka-school), or for admission to the military academy to military technical colleges for pilots, mechanical engineers, tank engineers, radar operators, communications officers, or to the school for politruks.
- 6. "Ammunition and weapons factories receive only politically reliable employees; so far / eptember 1957, they have not used slave labor, political prisoners. Most employees ere not permitted to move about in the factory. They have identification cards which entitle them to enter the shop in which they works /// employees of such factories, their families, private lives, opinions, relationships to other soo le (Jormanists end non-Communists) are closely checked in such factories by that a causity Corps informers (who are planted in all workshops as at the sequery, canteen employees, members of the worker militia, managers' courteries, etc); worker militia; factory guard; DON of the (/rmy Intelligence), Workers' Jouncil; Union Council.
- 7. "In autumn 1953 there was a change in the two maching factories of Brno (Grvni Brnenska, and Kralovopolske Etrojeny) Not mal Interprises of Brno).

  Both factories had discharged many nomen forker (whose hash in alted over 1000 crowns per month). This happened because the oviet mane had their orders, causing a surplus on the labor market.

  Intlocate of Brno in B
